CC: Rieger, Michael [MRieger@mt.gov]; Mikita, Cory [CMikita@mt.gov]; Benoit, John [JBenoit@mt.gov]
Subject: Tentative CFAC Update Meeting
Location: DEQ Cedar Street - Bitterroot Room (West Conference Room/Northside of Building)
Start: 7/16/2018 4:00:00 PM
End: 7/16/2018 5:30:00 PM
Show Time As: Tentative

Recurrence: (none)

All, I've outlined an agenda below – none of it is set in stone, but thought it would give us a plan for going forward. Also, I may have to step out at 10.30 for a short call with the Governor's office, this shouldn't impede the discussion. Also, Bitterroot has a smart board, if we need to project something for clarity. Revise as necessary.

Proposed Agenda

July 16, 2018 10:00 AM

Subject: Status of Columbia Falls Aluminum Facility

Objective: With three different regulatory programs on-site the objective of this meeting is to provide attendees an understanding of the status of their ongoing work and upcoming work, and to identify hurdles that may impede progress.

10:00 am Introductions and Cedar Street Safety Overview

10:10 am Status of Solid Waste Management Actions (Ricknold/others)

I'm thinking this is a lot of the metal recycling, building demo, etc. If the work is done, this will be short!

10:25 am Status of Hazardous Waste Management Actions (Mark/others)

I'm thinking this is two parts, asbestos, and the KO-88 wastes

10:45 Status of CERCLA Process (Mike)

I'm thinking this is just a general update of what CFAC/Glencore/Roux are completing

11:05 General Q&A

Probably some discussion of how each program is impacting other programs

11:20 Wrap Up and Action Items

11:30 Adjourn

Dick, Mark, and Rick, (Cory, John, and Mike, too)

Mike Cirian may be available to meet with us on Monday July 16 to discuss the status of the EPA investigation of the CFAC site. I don't have a specific list of topics but thought we should convene ourselves if possible. I would like to to;

- 1) The status of the EPA lead site investigation for CERCLA
- 2) The status of Hazardous Waste clean-up and management
- 3) The status of TSCA (Asbestos) mitigation (all done?)
- 4) Community Issues/Outreach

If others should be engaged please forward, this is a tentative block. Our other option is a conference call later in the month.

Tom
